**House of Freya continues to grow and we could not have done this without the loyal support of our clients, family and friends. Thank you!**

**ERICSON LABORATOIRE** This range of twelve hi-tech, high performance dermo-cosmetic facial treatments is customised to suit your skin type.

**BIO-OPTIC** A full eye contour treatment to combat those wrinkles, bags and dark circles.

**BOTU VIP** A non-surgical solution to deep wrinkles, this is a painless, risk-free anti-ageing wrinkle relaxer, with reinforced double action SYN@-AKE and FILLOX.

**DERMA-CALM** An anti-stress and anti-pain treatment for ultra-sensitive skin.

**DNA-VITAL** Powerful skin regeneration treatment, which boosts the healing process, stimulates collagen production and has significant anti-oxidant action. The freezing process has made it possible to develop products that require no preservatives, thereby strengthening the efficacy of the active molecules.

**ENERGY LIFT** Shed ten years in 42 days! This double-action lifting and slimming treatment will drain and slim down the areas where excess bulk accumulates (cheeks, double chin) as well as firm the skin tissue to visibly refine your facial contours.

**FRESH CAVAIR** Perfect for mature as well as devitalised skin this, the first refrigerated skincare line based on fresh caviar cells, combats premature ageing through moisturising, nourishing and firming. This triple-action anti-ageing treatment is fragrance and chemical preservative-free.

**MESO-VIT** Vitamin mesotherapy using skin-injection technology. Essential to life, the correct vitamins are key to our overall health and well-being. Our research departments have chosen vitamins A, C and E as essential to maintaining a healthy and youthful-looking skin.

**NOVACID** This complete skin renovation treatment employs the accelerated exfoliation of micro-dermabrasion using a nine-acid peeling complex to reveal renewed skin.

**PERFECTION** Employing two high-performance active ingredients, we work on two levels: avoiding excess progression of deep melanin towards the surface of the skin and lightening any pigmentation already existing on the surface. Be brown spot-free with a lighter and brighter skin.

**PURE BIOTIC** Ideal for the treatment of combination, oily and acne-prone skin, these products work by stimulating the skin's natural antibiotics. It balances the hormone levels and detoxifies the skin. The production of oil is regulated for a mattifying effect on shiny skin.

**SKIN TRANSFER SYSTEM** This original skincare method acts on the major causes of skin dryness: dehydration and oil dryness. It helps to improve the circulation of water in the skin cells, keeping the skin moisturised, while at the same time, enables the rebuilding of the skin oils, keeping the epidermis nourished. These two actions are fundamental in providing the skin with comfort, suppleness and density.

**SUPREME DHE-AGE** This high quality anti-ageing treatment is perfect for pre- or post-menopausal treatment. Enriched with DHEA-presursor, the intensive tissue regeneration properties will firm up ageing skin and kick start your youth mechanism once again.

**For optimum results, a course of 4-6 treatments is recommended. However, if it's a relaxing pamper you're after, a single treatment will suffice.**
